

EXO MEMO

MEMO is a **Mobile Nursing Module** that facilitates the follow-up and handling of hospitalized patients, avoiding errors and allowing the access to your own Medical software system for the registration of parameters and actions in the patient's medical record in real time.

HIGHLIGHTS

MEMO gives you the possibility to run your own Healthcare software system that will help you with:

- Accessing and updating the patient's electronic medical record.
- Applying the best practices for the patient's health.
- Interacting in real time with your own medication tracking software system.
- Eliminating any chance of error in the supply chain of medications.
- Bringing you a secure and practical way for the transportation of medicines.
- Minimizing any error for the diversion of the route of nursing personnel.
- Lightweight, easy to transport, noiseless and autonomous unit.

• **COMPUTER MODULE INTEGRATES**

A digital interface with 10" Touchscreen computer and dual band high-range WiFi connectivity.

The display can rotate for an easy adaptation to your own medical health software system design.

• **1D/2D SCANNER**

Quick and reliable label reading, compatible with all the market barcode labeling system standards.

Printers, RFID and NFC readers are optional as well as additional trays and shelves for different uses.

• **MULTIPURPOSE STAINLESS STEEL TRAY**

- Easy transportation of medication.
- It is removable for the cleaning and disinfection processes.
- It can be folded and adjusted in height according to your need.

• **MEMO STRUCTURE**

- Stackable with each other, optimizing the space occupied during sleep mode.
- Quiet antistatic medical wheels adequate for outpatient services.
- The front wheels of MEMO unit have a security brake system.
- Including silicone bumpers for shock absorption.
- Wall-friendly Energy docking to facilitate the unit charging.
- Battery charge light indicator.
- A centralized software can handle and indicate each MEMO battery status.
- **WE CAN COVER ALL YOUR NECESSITIES BY CUSTOMIZING MEMO'S STRUCTURE FOR THE THIRD PARTIES ACCESSORIES INTEGRATION**

• **POWER**

The battery included allows up to 72-hour autonomy of MEMO device.

• **CLIP-ON DESIGN**

The device is easily attached to the base, thus optimizing the space needed during standby.
