

Tracking of Assets and Individuals (Beacons)

Beacons are small electronic devices that repeatedly transmit Bluetooth Low Energy (BLE) signals. Household objects equipped with Beacons enable the publication of their location and facilitate the tracking of people and objects.

CHARACTERISTICS

- Compact devices.
- Autonomy greater than two years.
- Multiple formats of use.
- Panic/call button.
- Management software.

BENEFITS

- Efficient low consumption equipment.
- Real-time asset tracking.
- Patient identification.
- Signaling in real time of places or sectors.
- Essential personnel tracking.
- Placement of panic buttons or callers.
